Hi [Ex. 4 - CBI]

Unless - I missed something - which is definitely a possibility - I think that we are also waiting for the Region 3 data? I know Deb was working on this - can you check to see where we are.

I will let you know when anything new (requiring review by SERAS) is posted to FTP.

Thanks - Kelley

Kelley:

I believe that the only analysis that we have to validate is the Region 9 dissolved gases. I am in the process of validating these samples and will send out a memo tomorrow. Since, [Ex. 4 - CBI] is on vacation please cc me on any reports that are posted to the FTP site.

Thanks,

[Ex. 4 - CBI]

Hi [Ex. 4 - CBI]

Sorry for bugging you already.... but I need to check on the status of the review of the data for the 3 new wells/residences (HW-62, 63, 64) sampling in May.

As discussed yesterday, SERAS had completed the initial review of the R2 MBAS Reports & R9 GRO Reports and submitted comments to EPA R3 (Ft. Meade) on June 12th.

Please let me know your current projection for completing your review of the remaining reports that pertain to the data from R3, R6 and R9 (dissolved gases).

We are hoping you will be able to submit any remaining comments to our lab by the end of this week.

Also - I understand that Ft. Meade did receive some, but not all of the micro data from the subcontracted lab (NEL). Ft

Meade started reviewing what they have and we are working on getting the remaining data. I hope to get back to you tomorrow to let you know when to expect the data/reports to be posted to the FTP site.

Please don't hesitate to contact me with any questions - e-mail or cell phone (267-273-8859) is best.

Thanks again for your help - Kelley
